

4 Control

Technical Bulletin

Description and Use

4 Control is a clear blue liquid hand cleanser with a mild citrus fragrance. It is recommended for use as an antimicrobial hand cleaner in food preparation areas.

Features and Benefits

4 Control contains a blend of biodegradable cleansers derived from wheat and coconut oil to cleanse, plus glyceryl monooleate, an emollient found in the skin to improve moisture retention.

The pH of 4 Control is 5.5. This maintains the natural pH balance of the skin, unlike soap based products that can have a pH in the range 9 – 10 which leads to degreasing of the skin.

4 Control contains 0.3% Triclosan as an antimicrobial active.

4 Control is available in the Dominant Star System containers. These sealed units prevent risk of cross contamination, and are economical as only 1.5ml is dispensed with each pump.

How to Use

Either use through a refillable dispenser, or simply insert a new unit into the Star System dispenser.

Refillable dispensers should be washed and dried before refilling for maximum hygiene. If this is not possible, then always refill when the dispensers are empty or nearly empty.

As a hand cleanser, wet hands, apply to hands, lather, then rinse with water and dry.

Technical Data

4 Control contains a blend of biodegradable cleansers derived from coconut oil and wheat.

It has a pH of 5.5 to maintain the natural pH balance of the skin.
