

4 Protection

Technical Bulletin

Page 1 of 1

Issue Date: Dec 2006

Description and Use

4 Protection is a moisturising barrier lotion to protect hands from occupational exposure, leaving hands smooth soft and supple.

For use in hospitals, nursing homes and areas where frequent washing and environmental exposure is encountered.

Approvals & Registrations

Features and Benefits

4 Protection contains a blend of emollient compounds and cosmetic grade humectants. These reinforce the skin moisture barrier without leaving a greasy residue.

4 Protection contains Allantoin, which helps prevent, and protects chafed, chapped, cracked or wind burnt skin.

4 Protection is available in the sealed Dominant Star System containers which prevent the risk of cross contamination. Dominant's Star System is also economical as only 1ml is dispensed with each pump.

How to Use

Dispense a quantity of 4 Protection onto hands via the Dominant dispensing system, rub well into the skin until the cream disappears.

Apply a number of times a day to protect and moisturise the skin.

When Star System cartridge is empty, simply replace with a new one.

Usage Instructions (Dilutions)

4 Protection is a cream containing a blend of emollient esters and oils, humectants and Allantoin.

It has a pH of 6 to maintain the natural pH balance of the skin.

Technical Data

4 Protection has a pH of 6 and so is very mild on the skin.

It is available in hygienically sealed Star System containers to prevent risk of cross contamination.
