

Description and Use

Ammopol is a milky white liquid used as a wash and wax floor cleaner.

Features and Benefits

Ammopol contains detergents, sequestrants and a water soluble solvent plus Image floor polish. It cleans the floor and puts down a fine film of Image to maintain the polish level on the floor.

Ammopol has a mild herbal lavender fragrance making it pleasant to use.

How to Use

Ammopol gives best results when used to maintain floors already sealed with Image. Add ½ to 1 cup Ammopol to a bucket of water and wash floor. The floor may be buffed when dry to enhance the shine.

Use Ammopol 1 - 2 times per week to maintain the polish film. Do not use daily as the polish may build up on the floor.

Do not use if the floor is heavily soiled as the soils may become trapped in the polish film.

Technical Data

Ammopol contains Image, plus a blend of biodegradable detergents, water softeners and a solvent for cleaning. It has a pH of 9.8 in the neat form.

Pack Sizes

2 x 5L Bottles
