

Description and Use

A hand cleanser that contains no fragrance or colour. Ideal for use in food processing and preparation areas.

Approvals and Registrations

Aquista is a Liquid Hand Soap Type A. It may be used in all areas of food processing plants and meat export establishments.

Features and Benefits

Aquista is a non-perfumed, odourless hand cleanser. This means it will not taint foods with perfume odours.

Aquista is a neutral pH blend of cleansers with added lanolin oil. It is milder on the skin than soap based products that may have a high pH.

Aquista is available in the sealed Dominant Star System containers which prevent the risk of cross contamination. Dominant's Star System is also economical as only 1ml is dispensed with each pump.

How to Use

As a hand cleaner, apply to hands and arms, lather and rinse with water and dry.

Refillable dispensers should be washed and dried before refilling for maximum hygiene. If this is not possible, then always refill when the dispensers are empty or nearly empty.

Usage Instructions / Dilution Rates

Wet hands, dispense a quantity of Aquista onto hands via the Dominant dispensing system, lather, then rinse with water and dry.

When Star System cartridge is empty, simply replace with a new one.

Technical Data

Aquista is a neutral pH cleanser with no fragrance.

The cleansers in Aquista are classified as biodegradable.
