

Combi Foam

Technical Bulletin

Description and Use

Combi Foam is a heavy duty, foaming oven cleaner or in places where heavy oil, fat or grease removal is required.

Features and Benefits

Combi Foam is a strongly formulated product that quickly removes baked-on, or greasy soils from a range of hard surfaces. This can be applied neat for maximum effect, or diluted up to 1:40 (25ml/L) for less heavy-duty applications.

Combi Foam contains foaming detergents to assist with soil removal, surface wetting and surface cling to prolong contact times.

How to Use

Combi Foam is designed to clean stainless steel, steel and enamelled surfaces. It should not be used on aluminium surfaces such as range hood filters. Combi Foam is ideal for use in liquid-fed Combi ovens and should be used as per the machine manufacturers cleaning instructions.

Allow equipment to cool below 80°C before using Combi Foam, then apply to warm surface in neat or diluted form and allow to react for a few minutes. To clean large areas such as industrial deep fryers use Combi Foam through a foamer. Agitate using a brush or scourer pad then rinse off with plenty of water. Food contact surfaces such as grill plates can be rinsed with water, then a dilute acidic solution, to ensure all alkaline residues are removed.

To clean deep fryers, empty out the oil and fill with water. Add Combi Foam at a rate of 1:40 (25 ml/L) in water and heat to near boiling. Leave to soak, then empty and rinse with water and dry before refilling with oil.

Technical Data

Combi Foam is based on potassium hydroxide and a blend of water softening agents, dispersants and biodegradable detergents for effective cleaning.

Combi Foam is strongly alkaline with a pH of 14 in the neat form. Do not use on aluminium, galvanised, enamelled or painted surfaces.

Pack Sizes

2x5L Bottles Code:

Code: C10316

Dominant Colour Code

Hazard Information

Classified as hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

DANGER
Causes severe skin burns and eye damage
May be corrosive to metals

Poisons Schedule:
Dangerous Goods:

6
Class 8
PG II
UN 1719

Safety Information

Combi Foam is a strongly alkaline (caustic) product. Always wear safety goggles and chemical resistant gloves when using neat or in diluted form.

Store in a secure area that can be locked and segregate from any incompatible materials.

Do not mix with acids or oxidising agents.
