

Crème Cleanser Technical Bulletin

Page 1 of 1

Issue Date: March 2012

Description and Use

Crème Cleanser is a non-scratch cream cleanser for cleaning all hard surfaces such as metal, glass and laminex.

Features and Benefits

Crème Cleanser contains a calcite abrasive. This is softer than the silica abrasive used in some abrasive cleansers and does not scratch surfaces.

Being a liquid abrasive cleaner it is safer to use than powdered cleaners that have the potential for dust inhalation.

How to Use

Crème Cleanser is suitable for cleaning many surfaces including laminex, stainless steel, porcelain, glass, aluminium etc.

It is ideal in the kitchen for cleaning work surfaces, sinks, stoves, saucepans etc.

In the bathroom Crème Cleanser gets sinks and taps sparkling clean.

Usage Instructions

Crème Cleanser is easy to use, apply directly to the surface and agitate to loosen soil. Then rinse off with water or a damp cloth.

Crème Cleanser can also be used for cleaning alloy wheels on cars – just scrub in with a small brush and rinse off.

Technical Data

Crème Cleanser is a viscous cream containing a fine calcite abrasive. It also contains a blend of biodegradable anionic and non-ionic surfactants for efficient cleaning. The pH of Crème Cleanser is slightly alkaline at 9.
