

Deodorising Drops Technical Bulletin

Page 1 of 1

Issue Date: July 2013

Description and Use

Deodorising Drops are a highly concentrated blend of odour absorbing and fragrance compounds designed to destroy unwanted odours in all areas.

Features and Benefits

Deodorising Drops are highly concentrated and are packed in 30ml dropper bottles. Only one to two drops will remove most odours

Deodorising Drops contain odour absorbing compounds as well as perfumes. They don't just cover up odours, they destroy them and then leave a pleasant residual odour.

How to Use

Deodorising Drops can be used in many areas including bins, drains, toilets, waste disposal units, kennels, ashtrays and cars.

Simply add 1 to 2 drops to the area to be deodorised. Do not apply to paint or rubber.

Technical Data

Deodorising drops are a concentrated blend of odour absorbing compounds and perfumes in a solvent base. The product is not water soluble, but will evaporate away with time.

Deodorising Drops are combustible, but with a flash point of 65°C, are classified as non-flammable.
