

Dishwasher Powder

Technical Bulletin

Page 1 of 1

Issue Date: August 2012

Description and Use

Dishwasher Powder is a phosphate free powder designed for use in domestic dishwashers in homes, child care centres, aged care facilities and cafes.

Features and Benefits

Dishwasher Powder is a low alkalinity dishwasher powder containing activated oxygen bleach and enzymes to enhance cleaning performance. The low alkalinity means it is safe on all types of crockery and for use with septic systems.

Dishwasher Powder is packaged in 1kg jerrycans fitted with a child resistant closure for added safety. It also contains an anti ingestion agent as a further protection against ingestion.

It is also available in 750g plastic refill bags which can be used to refill the jerrycans giving maximum economy and minimum environmental impact.

Dishwasher Powder has a high level of non phosphate sequestrants to control scale keeping the dishwasher sparkling clean.

How to Use

In domestic dishwashers add 2 – 3 teaspoons to the dispenser.

Technical Data

Dishwasher Powder is an alkaline powder containing water softening agents, corrosion inhibitors, alkaline builders, low foam biodegradable surfactants, protease and amylase enzymes and an activated oxygen bleach. It has a pH of 10.8 at a 1% concentration
