

Fresh Lemons Technical Bulletin

Page 1 of 1

Issue Date: January 2013

Description and Use

Fresh Lemons is an economical Commercial Grade Disinfectant which can be used to clean, disinfect and deodorise any washable surface. Use dilution 1:50.

Features and Benefits

Fresh Lemons is an economy product. Even if overused by staff, the cost in use of Fresh Lemons is still low.

Fresh Lemons cleans, disinfects and deodorises in one easy step. It is safe to use on any washable surface. It contains water softening ingredients to boost cleaning performance and disinfecting ability.

How to Use

Use at a dilution of 1:50 (½ cup per 6 litres water).

Do not mix with any soaps, detergents or other chemicals as deactivation may occur.

Technical Data

Fresh Lemons is a mildly alkaline product with a pH of 9.3 in the neat form, and a neutral pH at use dilutions. It contains biodegradable detergents for cleaning and 2.5% quaternary ammonium compound for disinfecting.
