

Description and Use

HDFC is a heavy duty caustic cleaner for ovens, grills, hotplates and deep fryers.

Features and Benefits

HDFC is a strongly caustic product that quickly removes even heavily baked on soils off ovens, grills and ovens.

Due to its high strength HDFC can be used diluted with up to 20 parts water for less baked on soils and fatty deposits.

HDFC contains high foaming detergents and can be foamed over large areas in food plants making application quick and easy.

How to Use

HDFC is designed to clean stainless steel, steel and enamelled surfaces. It should not be used on aluminium surfaces such as range hood filters.

Allow equipment to cool below 80°C before using HDFC, then apply to warm surface in neat or diluted form and allow to react for a few minutes. To clean large areas such as industrial deep fryers use HDFC through a foaming applicator. Agitate using a brush or scourer pad, then rinse off with plenty of water. Food contact surfaces such as grill plates can be rinsed with a dilute vinegar solution after water rinsing to ensure all alkaline residues are removed.

To clean deep fryers, empty out the oil and fill with water. Add 1 cup of HDFC per 10 litres water and heat to near boiling. Leave to soak, then empty and rinse with water and dry before refilling with oil.

Technical Data

HDFC is based on sodium and potassium hydroxide, strongly caustic ingredients. It also contains a blend of water softening agents, dispersants and biodegradable detergents for effective cleaning.

HDFC is strongly caustic with a pH of 14 in the neat form.

Pack Sizes

2 x5L Bottles Code:	Code: 11707
15L Drum Code:	Code: 11694

Accessories

750ml Dispensing Bottle Labelled DX4	Code: 16545
---	-------------

Dominant Colour Code

Hazard Information & Safety

Classified as hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

DANGER

Causes severe skin burns and eye damage
Harmful if swallowed
May be corrosive to metals

Poisons Schedule:	6
Dangerous Goods:	Class 8 PG II UN 1719

HDFC

Technical Bulletin

HDFC is a caustic product. Always wear safety goggles and chemical resistant gloves when changing drums.

Store in a secure area that can be locked and segregate from any incompatible materials.
