

# Dominant<sup>®</sup> Lifter

Date of Issue: April 2003

## Description and Use

---

Lifter is an economical machine dishwashing detergent containing chlorine for destaining.

## Features and Benefits

---

Lifter contains water softening agents. These prevent scale formulation in soft to moderately hard water areas and reduce the need for descaling in very hard water.

Lifter contains a chlorine bleach. This assists with removal of tannin stains from tea and coffee and other bleachable stains.

## How to Use

---

Lifter is automatically dispensed by an electronic feeder. Simply change the drum when empty.

Lifter contains chlorine. Always store in a cool area and use old stock first to ensure the product has maximum chlorine content.

## Technical Details

---

Lifter is a caustic liquid containing water softening agents, corrosion inhibitors and chlorine for bleaching. It is used at 2.0 to 3.0 g/l.

Lifter contains no surfactants and is non foaming.

## Safety

---

Wear gloves and safety goggles when changing drums.

Lifter must only be used for machine dishwashing dispensed through an electronic feeder.

Never add manually, or use for manual dishwashing.

## Hazard Information

---

Classified as hazardous according to Worksafe Australia criteria – R35 Causes severe burns.

Poisons Schedule: 6  
 Dangerous Goods: Class 8  
 Packaging Group 2  
 UN No. 1719

## Packaging

---

Lifter is available in 10, 15, 25 and 200 litre drums.
