

## Description and Use

---

Marine Clean is a strongly acidic foaming liquid for removing rust, scale and marine growth from the interior and exterior of boats.

## Features and Benefits

---

Marine Clean contains a high level of phosphoric acid. This is a strong acid for effective descaling, but without the fumes of other mineral acids such as hydrochloric or nitric acid.

Marine Clean is formulated with foaming detergents to assist with penetration of soils, and to give a longer contact time if foamed on.

## How to Use

---

Use Marine Clean at dilutions from 1:5 for heavy rust, scale or marine growth to 1:50 for light deposits.

Apply using a mop, sponge or by soaking parts in a trough or tank.

Marine Clean can also be foamed or sprayed on for large areas. An approved respirator should be worn, or a full chemical suit with air supply in enclosed areas.

Do not use strong solutions on aluminium or galvanised surfaces.

As soon as deposits are removed, rinse off with plenty of water.

## Technical Data

---

Marine Clean is a liquid containing 78% phosphoric acid, plus foaming biodegradable surfactants and corrosion inhibitors.

It has a pH <1 in the neat form.

## Pack Sizes

---

2 x 5L	Code: 14332
25L Drum	Code: 12278

## Dominant Colour Code

---

## Hazard Information & Safety

---

Classified as hazardous according to ASCC criteria

R34 Causes burns.

Poisons Schedule:	6
Dangerous Goods:	Class 8
	Packaging Group III
	UN No. 1805

Avoid contact with skin and eyes. Wear chemical resistant gloves and goggles when using.

If spraying wear full protection including air supplied hood.

Do not mix with chlorinated products as chlorine gas will be evolved.
