

Mask

Technical Bulletin

Page 1 of 1

Issue Date: 6.02.07.

Description and Use

Mask is a clear green liquid with a long lasting fruity fragrance. It is used on any washable surface where light to medium duty cleaning is required, plus a long lasting reodorant effect.

Features and Benefits

Mask combines cleaning and deodorising in one easy to use product. The high fragrance level gives complete odour control even in areas such as toilets and bins.

Mask also contains a quaternary ammonium compound to assist in odour control by eliminating bacteria.

How to Use

Use Mask at a dilution of 1:50 (½ cup per 6 litres water) on any washable surface to clean and deodorise.

It can also be used as an air freshener by diluting 1:10 and spraying using a trigger spray set to dispense a fine mist.

Mask is not recommended for use in food preparation areas due to the high fragrance level.

Technical Data

Mask is a near neutral liquid with a pH of 6.5 containing biodegradable detergents, a quaternary ammonium compound and a high level of fragrance.

Pack Sizes

15L Drum

Code: 21558

Dominant Colour Code

Safety

Wear chemical resistant gloves if using for extended periods, or if the skin is sensitive. Wear goggles when dispensing the neat product.
