

Description and Use

PX88L is a concentrated low foam carpet cleaning liquid recommended for hot water extraction carpet cleaners. It can be used for cleaning carpets or fabric upholstery.

Features and Benefits

PX88L contains a blend of biodegradable low foam detergents for effective cleaning and no excessive foam build up in pick up tanks.

The high level of water softeners used enhances cleaning and protects machine pumps from scale deposits.

PX88L is mildly alkaline at use levels and so is suitable for use on all types of carpets including wool.

How to Use

When using in hot water extraction machines use at dilutions from 1:100 to 1:200 dependant on degree of soiling and water hardness. In waters with hardness of 150ppm or greater use at a dilution of 1:100 or stronger.

PX88L can also be used as a pre-spray on heavily soiled areas. Dilute 1:20 and spray lightly over carpet before extraction.

Technical Data

PX88L contains a blend of biodegradable low foam surfactants, a high level of sequestrants to soften the water and soil dispersion agents. It also contains a fresh fragrance to deodorise whilst cleaning

PX88L has a pH of 10.0 in the neat form, with normal use dilutions being in the range 8 to 9.
