

Description and Use

Quicksan is a ready to use spray sanitiser for use in the food and drink industries.

Features and Benefits

Quicksan contains a blend of alcohol and quaternary ammonium compounds to give a rapid kill and fast drying on surfaces.

This makes it ideal for sanitising when moving from one product type to another or when going on breaks.

Quicksan is available in 15 litre drums for easy dispensing into the 750 ml dispensing bottles for maximum economy.

How to Use

Thoroughly clean all surfaces with a suitable detergent solution and rinse with potable water.

Use Quicksan neat and spray onto surface and leave to dry.

Do not spray over food. Ensure surface is drained and dry before processing resumes.

Do not use on polycarbonate or other plastics that are susceptible to stress cracking.

Do not spray near motors or other unprotected electrical equipment, not near flames or other ignition sources.

Technical Data

Quicksan contains a blend of alcohol and quaternary ammonium compounds. At use dilutions it gives 200ppm quaternary ammonium compound, the amount recommended by AQIS for use as a no-rinse sanitiser.

Quicksan has a pH of 7, which is neutral.

Quicksan is classified as flammable with a flash point of 28°C (closed cup method).

Pack Sizes

6x750mL Bottle Code: 27087

Accessories

750ml Dispensing Bottle Code: 25385
Printed Quicksan

Dominant Colour Code

Hazard Information & Safety

Classified as hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS).

Eye Irritation 2
Flammable Liquid 2
Specific Target Organ Toxicity – SE 3

DANGER

Causes serious eye irritation
Highly flammable liquid and vapour
May cause drowsiness or dizziness

Poisons Schedule: Not Classified
Dangerous Goods: Class 3
UN 1219
PG III

Safety

Wear chemical resistant gloves when spraying.
Keep away from sources of ignition.
Keep out of reach of children.
Do not spray over people or animals.
