

# Smart Fresh Technical Bulletin

Page 1 of 1

Issue Date: 6-May-16

## Description and Use

---

Smart Fresh is a clear yellow liquid with a strong Quandong and Lime fragrance.

It is used to deodorise bedrooms, common rooms, corridors and toilets in aged care facilities, hotels, motels etc.

## Features and Benefits

---

Smart Fresh is a highly concentrated deodorant for maximum economy. Only 30 – 60ml is required to make 750ml of a ready to use air freshener.

Smart Fresh has the same fragrance as Quandong and Lime the disinfectant cleaner. This allows fragrance levels to build up rather than compete when used together.

Smart Fresh contains an odour absorbing compound to neutralise odours, as well as a fragrance to give a long lasting reodorant effect.

Smart Fresh is packaged in 5 litre bottles fitted with the Protekta Cap™ system. This eliminates contact with the neat chemical as the product can only be dispensed when the pick up connector is screwed on.

## How to Use

---

Connect the bottle to a Smart Pump or blend centre by unscrewing the transport cap and screwing on the pick up cap.

In a trigger spray add 1 pump to the bottle and top up with water. If odours are bad 2 pumps may be used. Or fill directly from a blend centre.

Adjust trigger spray nozzle to a fine mist, and spray into the air.

## Technical Data

---

Smart Fresh contains a blend of fragrance and odour absorbing compounds, plus surfactants to solubilise.

It has a pH of 8 in the neat form.

## Pack Sizes

---

2 x 5L Protekta bottle

Code: C20213

## Dominant Colour Code

---

## Hazard Information

---

Smart Fresh is classified as hazardous under the GHS system.

### WARNING

**Causes serious eye irritation**

Poisons Schedule:

Not Classified
