

Smart Wizard

Technical Bulletin

Dominant[®]

Description and Use

Smart Wizard is a transparent, red liquid with a long-lasting fragrance.

Designed as a highly effective hard surface cleaner for use on all washable surfaces.

Features and Benefits

Smart Wizard is a concentrated blend of detergents, cleaning aids and functional polymers, which provide additional protection and make repeated cleaning easier.

The fragrance in Smart Wizard is the same as that used in Smart Fresh, so the deodorising properties are increased if both products are used together. Being highly concentrated, Smart Wizard is economical to use.

Smart Wizard is packaged in 5 litre bottles fitted with the Protekta Cap™ system. This eliminates chemical contact as the product can only be dispensed when the pick-up connector is screwed on.

The colour of Smart Wizard, the transport cap, pick up connector, main panel on the label and Smart Pump are all red to make it easy for staff to select the correct product.

How to Use

Connect the bottle to a Smart Pump or blend centre by unscrewing the transport cap and screwing on the pick-up cap.

Dilution Instructions:

Trigger spray bottles: add 1-2 pumps (30–60 mL) to the bottle and top up with water.

Floor Cleaning: In a bucket add 2-3 pumps (60-90 mL) to a bucket of water (~5-10L), or fill directly from a blend centre.

Technical Data

Smart Wizard is based on a blend of biodegradable detergents, cleaning aids and polymers.

Smart Wizard has a pH of 7.6 in the neat form.

Pack Sizes

2 x 5L	Code: 20240
750 mL dispensing bottle	Code: 10223

Dominant Colour Code

Hazard Information

Classified as hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

DANGER

Causes serious eye damage

Flammable liquid and vapour

Poisons Schedule: Not Classified

Dangerous Goods: Not Classified

Safety

Avoid contact with skin and eyes. Wear chemical resistant gloves and goggles when using.

Keep away from sources of ignition.
