

### Description and Use

Sparkle is a clear blue liquid rinse aid suitable for use in all types of dishwashers.

Sparkle is injected into the rinse to make the water sheet off evenly for a sparkling finish.

### Features and Benefits

Sparkle is a concentrated product so only 1-2ml is used each cycle. This means a drum lasts a long time.

Sparkle contains a special scale control additive. This controls scale formation in the rinse lines in hard water areas and helps neutralise any residual alkalinity.

The surfactants in Sparkle are extremely low foaming to prevent foam build up in machines. They are also classified as biodegradable.

### How to Use

For commercial dishwashing machines, Sparkle is dispensed by automatic feeding equipment supplied by Dominant. Simply change drums when empty.

For domestic dishwashing machines, fill rinse aid dispenser.

### Technical Data

Sparkle contains a blend of low foaming detergents to help the rinse water sheet off, plus scale control additives.

It has a pH of 4.5 in the neat form which is slightly acidic.

### Pack Sizes

375mL Bottle:	Code: 14588
2x5L Drum:	Code: 17119
15L Drum:	Code: 17190

### Accessories

750ml Dispensing Bottle	Code: 10455
Flip Top Cap	Code: 19512
Sparkle Label to Suit Dispensing Bottle	Code: 10884

### Dominant Colour Code

### Hazard Information & Safety

Classified as hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS)

#### WARNING

**Causes serious eye irritation**

Poisons Schedule:	N/A
