

Super Soak

Technical Bulletin

Page 1 of 1

Issue Date: October 2012

Description and Use

Super Soak is a multi-purpose powder combining oxygen bleach for destaining with detergents, enzymes and alkalis for cleaning. Super Soak is ideal for use in the laundry as a soaker or wash booster for wine, coffee, fruit juice and other food based stains. It can also be used in the kitchen to destain coffee and tea cups.

Features and Benefits

Being an oxygen bleach Super Soak is much safer to use than chlorine bleaches and eliminates problems with accidental removal of colour from fabrics.

Super Soak is a concentrated powder with 3.3% activated oxygen, so a little goes a long way. Being an oxygen based powder it is very stable with a long shelf life.

Super Soak contains a blend of protease, lipase and amylase enzymes to help remove a wide range of food type soils.

Each 4kg pail of Super Soak comes with a 50ml measuring scoop for easy accurate dosing.

How to Use

In the kitchen use 1 scoop per 10 litres hot water for destaining. Soak items for one hour then rinse.

In the laundry as a booster in top loaders using Motel or Top Shot add from ½ scoop in a small machine to 1 scoop in a large machine. If using with Village Wash or Blue Lake add from 1 to 2 scoops. Use half the amount in front loading machines.

As a soaker for nappies or other soiled items use ½ scoop in a 10 litre bucket or 1 scoop in a 20 litre bucket.

Do not use on wool, silk or other delicate fabrics. Super Soak works best in warm to hot water.

Technical Details

Super Soak is an alkaline powder containing water softening agents, alkaline builders, enzymes and biodegradable anionic and non-ionic detergents. Super Soak is a phosphate free formulation.

It contains 3.3% activated oxygen. Super Soak has a pH of 11.1 at a 1% dilution.

Pack Sizes

4kg bucket

Code: 15416

Dominant Colour Code

Hazard Information

Classified as hazardous according to Safe Work Australia criteria R36 Irritating to eyes

Poisons Schedule: Not classified
Dangerous Goods: Not classified

Safety

Handle carefully to avoid creating dusts. Gloves are recommended when handling material. Keep out of reach of children
