

Surge

Technical Bulletin

Page 1 of 1

Issue Date: January 2013

Description and Use

Surge is a non-caustic, chlorinated dishwasher powder, designed to be used in conjunction with Dominant's Simplicity System.

Features and Benefits

Surge is a non-caustic dishwasher powder dispensed through a simple to use canister system. This makes it extremely easy and safe to use.

Surge contains high levels of water softening agents for scale control and a chlorine bleach for destaining and to assist with sanitation.

How to Use

When the replace detergent supply light indicates more product is needed, simply remove the empty canister, remove the purple seal from the end of the new canister and insert into the Simplicity System Dispenser Unit.

Do not remove the screen cap on the canister.

Technical Data

Surge is an alkaline powder containing water softening agents, alkaline builders, corrosion inhibitors, low foam wetting agents and a chlorine bleach.

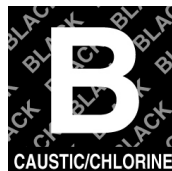

It has a pH of 11.9 at a 1% dilution.

Pack Sizes

4 x 3.25kg Canister

Code: 17172

Dominant Colour Code
