

Tyre Slick Technical Bulletin

Page 1 of 1

Issue Date: August 2013

Description and Use

Tyre Slick is a clear colourless liquid tyre dressing designed to enhance the appearance of tyres.

Features and Benefits

Tyre Dressing is quick and easy to use and dries to a shine within a few minutes.

Any overspray or spillage can be simply wiped off with water without damaging any paintwork.

Tyre Slick is ideal for car hire companies, taxis, car yards, funeral parlours, or any other area where the appearance of the vehicle is important.

How to Use

Wash the vehicle and allow the tyres to dry. Then apply Tyre Slick to the tyres using a brush, rag or trigger spray. Wipe off any overspray with a wet cloth.

Wear gloves and safety glasses when using. Use in a well-ventilated area away from any ignition sources.

Technical Data

Tyre Slick contains tyre dressing agents in an alcoholic water solution. The alcohol allows the tyres to dry quickly.

It has a pH of 7 in the neat form.

Tyre Slick is flammable with a flash point of 22°C
