

# Dominant® D'amia

Date of Issue: June 2003

## Description and Use

D'amia is a very pale green lotion hand cleaner designed for cleaning and protecting the skin.

In winter people often experience problems with dry skin that can lead to dermatitis. D'amia helps protect the skin by adding extra emollients with each washing.

## Features and Benefits

D'amia contains a blend of very mild cleansers, plus avocado and macadamia nut oils. D'amia cleans and puts rich emollient oils back into the skin surface to protect the skin and leave it feeling silky soft. The avocado and macadamia nut oils contain high levels of monounsaturated oil and are similar to the natural sebum produced by the skin. These replace sebum lost by washing and moisturise the skin and improve skin elasticity. The avocado oil is also rich in vitamins A and E and in phytosterols. These help nourish the skin.

D'amia has a pH of 5.5 to match the natural skin pH.

## How to Use

Wet hands and dispense a small quantity of D'amia onto the skin. Work into skin, then rinse off and dry thoroughly.

Due to the high oil content of D'amia the foam level when washing is very low or not detectable. This is a feature of the product and does not detract from its cleaning performance.

## Technical Details

D'amia is an emulsion cream containing mild biodegradable cleansers and avocado and macadamia nut oil. It has a pH of 5.5 in the neat form.

## Safety

D'amia is a mild product. No special precautions are needed whilst using.

## Hazard Information

Not classified as hazardous according to Worksafe Australia criteria.

Poisons Schedule: Not classified  
Dangerous Goods: Not classified

## Packaging

D'amia is available in 750ml Star System cartridges packed 4 to a carton.
